

# Abdusalam Hafiz

## Full stack developer

Addis Ababa, Ethiopia

[abduslamhafiz@gmail.com](mailto:abduslamhafiz@gmail.com)

251917949637

As full stack developer I have experience in PHP, Laravel, JavaScript, Vue.js, Flutter and other tech skills. I bring a flexible set of skill to any development project. My expertise in this skill allows me to create create robust and scalable website and mobile apps that satisfy the requirements of both consumers and companies. Additionally I am a perfect fit for collaborative development projects since I have excellent communication skills and the capacity to work well in a team setting. In general, I am a talented and passionate developer who is committed to producing excellent code and user experiences.

## Work Experience

---

### Full Stack Developer

Biruh test - Addis Ababa

February 2021 to November 2021

- Biruh tesfa is a micro financial service working on Addis Ababa.
- We developed a full system management web application for the company
- I have worked with collaborating with team of developers to design and implement scalable and maintainable web applications using Laravel.
- Developed custom modules and plugins to meet specific client requirements.
- Optimized application performance by identifying and resolving misunderstanding with collaborating with clients and project managers.
- We improve response time and bottlenecks in code, database queries, and server configurations.
- We have used different libraries and packages like jQuery, Yajra Datatable.
- Successfully developed a custom Laravel application that reduced manual data entry by 75%.

### ASTU Guide mobile app

ASTU - Adama

April 2021 to July 2021

When I enrolled to Adama science and technology university I have a lot of struggles to find the building and what course I'm going to take.

So me and my friend start developing a mobile application that helps not only the student even the staff members to search building and showing them with google map.

ASTU guide has a lot of features like helping ASTU students to find building, what they are going to learn , material of courses ,and gives them a better information

I've created using flutter and Laravel and also to cache a server data I have used Hive package

### Full Stack Developer

Private - Addis ababa

March 2020 to April 2021

- Developed a web-based payment platform using Laravel and Vue.js.
- Implemented security measures such as encryption, tokenization, honeypot, throttle to protect sensitive data and ensure compliance with industry standards.
- The platform invites stock holders to use to use our api to integrate to thier system.

## **PHP Framework**

Self

December 2020 to January 2021

- It is a simple MVC framework using php that include model, view, controller and view it mostly looks like the Laravel framework but with simple and easy to use
- I used apache .htaccess fille to redirect all the request to the index.php file
- I achieved this framework with out the using of any package manager(composer) so I write the autoload from scratch

Charity organization - wamberg

Achievements/Tasks

I have created and deployed a website for wamberg charity organization with basic functionality
